

# AASHUJEET RAI

FRONT-END WEB DEVELOPER

## PROFESSIONAL SUMMARY

As an enthusiastic front-end web developer, I have successfully executed four major projects. My expertise in front-end technologies includes HTML5, CSS, and Javascript, and I'm eager to expand my skillset further, particularly in CSS3 and other related areas.

## TECHNICAL COMPETENCIES

Java Script | Css | HTML5 | Bootstrap |  
Excel |Powerpoint |  
Github | C | C++

## PROJECTS

- **QUESTION LIBRARY** Feb 2023 - May 2023
  - As part of my responsibilities, I focused on developing the website's front-end, which includes a range of questions and various course categories. The website is designed to provide an accessible and user-friendly platform for both teachers and students. Users can upload, share, and search for questions, as well as design and run queries. Our team utilized the Django web framework and integrated SQLite for the background management system. The project underscores the significance of employing contemporary web development techniques and tools to ensure a cohesive and efficient website. The document also outlines potential future improvements for the project.
- **STOCK PRICE PREDICTION DASHBOARD USING STREAMLIT** April 2022 - July 2022
  - For this website, we utilized HTML and CSS to create the fundamental front-end. Our project leveraged Python, including the LSTM model, and several Python libraries. Among the outcomes, we created a dashboard that provides insight and visualization to aid in predictions.
  - Our objective was to empower users to make better investment decisions by predicting stock prices accurately, leading to significant profits.
- **BLOGGING WEBSITE** February 2021 - May 2021
  - I primarily focused on the front-end development of this project, utilizing HTML5, CSS, and Javascript to create a functional and visually appealing blogging website. The project was divided into two main parts: front-end and back-end development.
  - The objective of this project was to offer a web-based platform where users could share their stories, images, news, and videos about their daily experiences. To facilitate this, we created several categories to help users organize their content on the website. Overall, we were able to successfully create and execute the project.
- **ECOMMERCE WEBSITE** June 2022--August 2022
  - Utilizing the programming languages of JavaScript, HTML, CSS, SQL, and PHP, we have crafted a remarkable creation, complemented by the magical abilities of Bootstrap. Our mesmerizing symphony comprises both front-end and back-end development, resulting in a powerful product.
  - This enchanted work has opened a gateway to a world of possibilities, catering to individuals from all walks of life. Our objective was simple: to offer a platform that transcends time and space, providing a diverse range of products at your fingertips.
  - Our team conducted this ritual of creation on Udemy, an online training arena that nurtures the seeds of magic. The project, an exemplar of our mystical abilities, serves as a testament to our skill and expertise.

## CERTIFICATION

- Programming Foundations with JavaScript, HTML and CSS (with Honors ( Coursera ))
- Business Intelligence Concepts, Tools, and Applications (Coursera)
- Web Application Technologies and Django (coursera)
- Programming for Everybody (Getting Started with Python(cousera)
- The Complete 2023 PHP Full Stack Web Developer Bootcamp

## EDUCATION

### D.A.V PUBLIC SCHOOL

Session: 2017-2018

- Matriculation (CBSE)
- Percentage: 60.8%

### CIPET

Session: 2018 -2021

- Diploma in Plastic Engineering [DPT]
- Percentage: 72.8%

### CHANDIGARH UNIVERSITY

Session: 2021 - 2024

- Bachelor of Technology (B.Tech)
- Percentage : 67.5%

## INTERPERSONAL SKILLS

- Enhancing teamwork and decision-making skills
- Developing leadership and negotiation abilities

## LANGUAGE

- English| Hindi

## TRAINING

- Full Stack Web Development through UDEMY (online training )
- Completed software testing through Virtusa Company ( On Campus ) - Chandigarh University
