AASHUJEET RAI

FRONT-END WEB DEVELOPER

PROFESSIONAL SUMMARY

As a passionate front-end web developer, I have completed four major projects. Possessing a wide range of skills in front-end including HTML5, CSS, and Javascript, I am eager to advance my capabilities further, particularly in CSS3 and other areas.

TECHNICAL COMPETENCIES

Java Script | Css | HTML5 | Bootstrap|
Excel |Powerpoint|
Github |
C | C++|

PROJECTS

- **QUESTION LIBRARY**   Feb 2023 - May 2023
  - I have worked on the front-end part of the website which displays the following question on the site and shows different categories of questions through which students or any user can go directly to any course that is presented on the website. My team has completely built a website that provides teachers and students with an easy-to-use platform for accessing, searching, and creating questions. The site allows registered users to upload and share questions, as well as design and run queries.
  - The website is built using the Django web framework, which integrates. The background management system is built using SQLite. This project highlights the importance of modern web development techniques and tools to create a compelling and user-friendly website. The document also presents future developments and improvements to the project.

- **STOCK PRICE PREDICTION DASHBOARD USING STREAMLIT**   April 2022 –July 2022
  - Worked on the basic front end of this website using HTML and CSS only. In this project, we used Python, the LSTM model, and many more Python libraries. We developed a dashboard that produced an outlook or an overview to help us with the visualization of the prediction.
  - The goal of this project was that anybody could make a better investment with the idea of predicting stock prices through which it will give gain significant profits for the users.

- **BLOGGING WEBSITE** February 2021 – May 2021
  - I have worked on the front-end part of the project by using HTML5, CSS, and Javascript. In this project, we have successfully created and executed this Blogging website.
  - This project was developed in two parts 1st Front-end development & and 2nd back-end development.
  - The goal of this project is to provide the user on the world web a platform where anyone can post their stories, images, news, and videos about what's going on in their day-to-day lives.Ii this we have created various categories through which users can categorised their blogs on the website

- **ECOMMERCE WEBSITE** June 2022--August 2022
  - In this project, we have successfully created and executed this project by using JavaScript, HTML, CSS SQL & PHP, and Bootstrap. This project was developed in two parts 1st as Front-end development & and 2nd as back-end development.
  - The goal of this project is to provide the user on the world web a platform where different categories of products are present and users can watch them and buy their basic needs.
  - This project was conducted on Udemy during my online training period and it was a sample project to work on
